

Look Good...Feel Better.

The cosmetic industry helping women cancer patients look their very best

## **LOOK GOOD...FEEL BETTER Beauty Workshops for English Speaking Cancer Patients**

“Let us put a smile on your face” is a wonderful head line summing up everything we aspire to with LOOK GOOD...FEEL BETTER. Thanks to the support of leading cosmetic companies in Switzerland, a free programme of beauty workshops is now running in 16 hospitals throughout Switzerland. The simple formula is a proven success. It is so beneficial and appreciated, not only by patients, but also by health professionals who firmly believe in the “feel good factor”.

### **Treat yourself!**

Come along and join a small informal workshop. By demonstrating a 12-step skin care and make-up regime, our professional beauty advisers can help you deal with the visible side effects of your treatment and show you how to develop your make-up skills. The sessions are lots of fun and a real morale booster!

Different companies within the Swiss cosmetic industry joined together to establish the Foundation, which became a registered charity in December 2005. In partnership with hospitals and cancer support groups, the Foundation has developed and is now offering this free service nationwide to women cancer patients who undergo a medical treatment and are able to participate.

In collaboration with the English Speaking Cancer Association ESCA in Geneva we organize our free of charge beauty workshops for English speaking cancer patients who undergo a medical treatment. The beauty workshops take place in Geneva at the premises of the ESCA approximately three times a year.

If you are interested to attend one of our English speaking beauty workshops, please contact the English Speaking Cancer Association directly, Tel. 022 791 63 05 or [info@cancersupport.ch](mailto:info@cancersupport.ch) (advanced booking is necessary owing to limited space)

### **Important Notice**

If you take part in the LOOK GOOD...FEEL BETTER programme you will receive a package of products which are supplied free of charge by their manufacturers.

Because you are under medical supervision it is important that you discuss any side effects of your treatment and possible adverse reactions to cosmetic products with your doctor. Your doctor must resolve any questions you have about which products are appropriate for use during your therapy.

If you have a diagnosed allergy/sensitivity to any cosmetic ingredient, or believe that you have such an allergy/sensitivity, you should not use the products provided but should bring to the session your own products.

The Foundation, participating hospitals, social services and support groups make no representations, express or implied warrants or endorsements regarding the products supplied with the LOOK GOOD...FEEL BETTER programme and subject to the limitations imposed by law, can accept no liability or responsibility for any injury, loss or damage whether consequential or otherwise, suffered by participants in the programme and/or clothing or other possessions.
